

**Project Paridhi Autumnal equinox on 22nd September 2018**

Dear Parent! Greetings!

'Project Paridhi' is a flagship Project of SPACE which was launched in 2010 is now conducted 4 times a year on days of Solstice and Equinox. Project Paridhi is a hands-on science activity to measure the Earth! This activity proves science can be best learnt by doing! Sitting outdoors, participants will measure shadows casted by the sun, and using trigonometry they will learn how simple it is to deduce the circumference of the Earth from the measurement of sun shadows. Grade VII students are participating in this and since it is a Government Holiday we want consent from the parents for the same. Kindly note transport will not be provided on this date.

-----Consent Slip -----

I \_\_\_\_\_ parent of \_\_\_\_\_ class \_\_\_\_\_ is hereby sending my consent for the same.
